

FREE ONE-PAGE CHECKLIST

Turtle Tank Weekly Clean

Pin it near the tank and tick one column each week. Plan water changes for your habitat's needs, and do not wait for odor as the only signal.

TASK	WK 1	WK 2	WK 3	WK 4
Heater unplugged and cooled per its instructions	☐	☐	☐	☐
Substrate and corners siphoned in a partial water change	☐	☐	☐	☐
Checked behind decor, rocks, ramps and plants	☐	☐	☐	☐
Algae film wiped with a panel-safe aquarium pad	☐	☐	☐	☐
Basking dock scrubbed, no soap	☐	☐	☐	☐
Refill water conditioned, dosed from the label	☐	☐	☐	☐
Refilled, heater restored, filter flow checked	☐	☐	☐	☐
Water tested after a large change	☐	☐	☐	☐

GALLONS REPLACED

CONDITIONER DOSE (LABEL)

WATER TEST RESULT

KEEP IN MIND

Rinse clogged filter pads in removed tank water, not tap water, and never replace all the media at once. If odor seems to come from your turtle, or you see shell changes or poor appetite, contact a reptile veterinarian.

WANT THE WHOLE ROUTINE?

The Turtle Tank Cleaning Checklist, 12 pages

Adds smell triage, daily, monthly and seasonal checklists, water-change and filter logs, troubleshooting, vet signs and a 52-week tracker. Find it at pawsfinsandshells.com
